

Lezco Plumbing: website and local SEO

Prepared after a review of lezcoplumbing.com and a working replacement site.

People searching for a Lake Forest plumber start in Google Maps, not on a homepage. You are not in that map pack today, and the website is not ranking on its own either. The replacement site we showed you fixes the on-page half. Maps, listings, and reviews are the other half.

WHERE YOU STAND

0 Organic keywords and organic traffic (Ahrefs, 18 Aug 2026)	Not in pack Map pack for “plumber Lake Forest” — Olson, Stevenson, Pristine are	Sitemap 500 Google is pointed at a sitemap that errors	~6 pages Indexable HTML. No service or city URLs to rank
--	---	--	--

Search Console is not verified for this domain, so Google’s own click data could not be pulled. CSLB #1120970 (C-36) is not shown on the live site.

WHAT WE FOUND ON THE LIVE SITE

- **Thin structure.** Home plus one services page. No dedicated drain, leak, water heater, sewer, or emergency URLs.
- **No city pages** for Mission Viejo, Irvine, Aliso Viejo, Laguna Hills, Laguna Niguel, or Rancho Santa Margarita.
- **Name / address / phone drift.** Site is Lake Forest, (949) 994-9828. Some listings have pointed at Irvine, Anaheim, or an older 714 number.
- **License not on the page.** Homeowners who check CSLB have to leave the site.
- **Junk link neighborhood.** Hundreds of low-quality backlinks. That can hold rankings down. Treat as cleanup, not as a report card.

SEARCHES WORTH WINNING FIRST

SEARCH	VOL / MO	NOTES
plumber lake forest	200	Map pack. Keep “CA” in titles
emergency plumber lake forest	150	High intent, after hours
plumber irvine	450	Nearby city page
water heater repair lake forest	100	Needs its own page
plumber orange county	700	Skip first — harder SERP

Source: Ahrefs Keywords Explorer, US, 19 Aug 2026. City “plumber” terms often run \$25–\$35 per ad click.

WHAT THE REPLACEMENT ALREADY DOES

Dedicated pages for drain, leak, water heater, sewer, and emergency; city pages for the six south-county towns around Lake Forest; CSLB #1120970 linked to the state lookup; quote form to info@lezcoplumbing.com (emergencies told to call); working sitemap and one Lake Forest name/address/phone. Homepage faucet photo is yours. Other photos are stock until you send job shots. A new website does not create map-pack rankings by itself — it is the page Google should send people to once the listing is fixed.

90-DAY PLAN IF WE TAKE THIS ON

Days 1–14 Launch the site. Verify Search Console. Submit the sitemap. Audit Google Business Profile. Confirm the license line.	Days 15–45 Align listings to one NAP. Close old 714 / Wix footprints. Load job photos. Ask for a review after completed jobs.	Days 46–90 Profile posts, review replies, coverage cleanup, toxic-link review. Measure the map pack — not vanity traffic.
--	---	---

TWO LINE ITEMS · WHAT WE NEED TO START

1. Website Replace live WordPress with this structure on lezcoplumbing.com. Your photos, license, and quote form. One-time build, then hosting and small edits.	2. Local SEO Google Business Profile, citations, reviews process, Search Console, and link cleanup. Monthly — the pack is a race against shops already in it.
---	---

To start: Google Business Profile access, permission to verify Search Console, confirm CSLB #1120970 is public, and 10–20 job photos from the truck.
